Nagma's Antarang Voice

Nagma Sayyed

Makeup Artist

"I had a blank page when it came to my career. Antarang helped me discover my passion for makeup and motivated me to finish my certificate course. Before Antarang, I had tried various jobs, but none of them felt enjoyable. I realized that the 9-5 routine wasn't my fit. That's when I was advised to choose a specific path.

Antarang gave me the courage to explore my interests and turn my passion into a profession. Through their guidance, I not only found a path that excites me but also learned that it's okay to dream big and step outside the ordinary. They helped me see that my unique voice and creativity could shape my future in ways I had never imagined.

Today, I'm building a career that brings me joy and allows me to express myself through my work. Antarang reminded me that every journey starts with a single step—and the first step is believing in your voice."

Deepa's Antarang Voice

"When Antarang asked us, 'What do you like to do the most?' even the quietest of us got a chance to speak up. I really learned a lot from Antarang. They took us to see different places, helped me plan for my career options, and taught me how to build a successful future.

Antarang made me realize that my voice has power—that sharing my thoughts and dreams could lead to real opportunities. Their guidance gave me the confidence to imagine a future I never thought possible, and their belief in me inspired me to believe in myself.

Every lesson, every journey, and every conversation reminded me that even one voice can make a difference. Antarang doesn't just support us; they amplify our voices so we can share our stories and inspire others. With their help, I now feel ready to take the next step in my life, knowing my voice matters."
